

WORD ON WHITE HOUSE

June- July 2024

A Publication of the City of White House

105 College Street • White House, Tennessee 37188

WWW.WHITEHOUSETN.GOV

The Board of Mayor and Alderman honored Miss Cora Fuller with a Proclamation for Childhood Leukemia Awareness

During the May 16th Board of Mayor and Alderman meeting, Vice-Mayor Jana Spicer had the heartfelt honor of reading a proclamation for the incredible Cora Fuller on behalf of Mayor John Corbitt.

The proclamation highlights the extraordinary resilience and spirit of Cora, who has already shown more bravery at just five years old than most of us could ever imagine. Diagnosed with Acute Lymphoblastic Leukemia in January, Cora has been courageously battling her way through treatment at Monroe Carell Jr. at Vanderbilt. Cora's journey has inspired us all and

is a poignant reminder of the strength of children facing adversity. Her story is one of adventure, feistiness, humor, and an unmatched capacity for empathy and love, touching everyone with the privilege to know her.

To honor Cora and to raise awareness for childhood leukemia, Mayor Corbitt has proclaimed May 17th, 2024, as Childhood Leukemia Awareness Day in the City of White House. This day is dedicated to increasing awareness, supporting research, and standing in solidarity with all the children and families affected by this disease.

Greetings

FROM YOUR CITY ADMINISTRATOR

Gerald O. Herman

Greetings,

Many of you on our Sumner county side of the city recently received your updated appraisal value from the Sumner County Assessor of Property office. Traditionally Robertson County and Sumner County update the appraisal of properties every five years. The challenge for us in the city is that they do not do these updates in the same year. Robertson County did their re-appraisal the previous year. Many of you are excited to see your property value go up for resale purposes, equity, and home equity loans. However, the fear of having a higher property value and what that would mean in higher property taxes causes anxiety for others.

Living in the great state of Tennessee has many benefits. One of those benefits is that the State does not allow

cities the pleasure of increasing property taxes automatically just because the appraised value on your home goes up!

Last year when our Robertson County side of

letter from the State telling us what our certified tax rate for the new year is to be.

So here is what happened to us last year when we received the new certified

White House received their new appraised value the tax rate at the time was \$1.2862. For our Sumner County side of the City, it was the same tax rate of \$1.2862. The State of Tennessee has an equalization law that requires the tax

rate to be set based on the appraised valuation. In addition, the State uses a formula to set the tax rate for the cities that span over two or more counties. Each summer we receive a

property value was lower, and the tax rate was higher.

But something else interesting happened. Sumner County, White House property owners had their rate increase from \$1.2862 to \$1.3365. The State did this so that the City of White House would collect the same amount of property tax.

I tell you all this so that our Sumner County, White House property owners can expect to see the tax rate drop significantly this year because of the higher property re-appraisals. We could see it go down as low as the Robertson County side.

The State of Tennessee does allow cities to increase the local property tax rate above the certified tax rate. But, before such a vote can be taken to raise the rate the city has to have this done in ordinance form. The ordinance must have two readings at two different meetings. The meeting dates and times must be posted prior to such meetings. Public comment on any such increase must be allowed at the second meeting prior to the ordinance being voted into law. Hope this gives you some relief concerning property taxes. May you be safe, happy, and healthy during the summer months.

The Planners Corner

Jenna Nelms
Planning Technician

In the 'Planners Corner' series, we will explore how the Code Enforcement Staff keep White House beautiful, focusing on city signage and property maintenance.

It is that time of year! With beautiful warm weather and rain, comes lots of lush green grass around the city. There is nothing like a maintained lawn of thick turf in the Spring and Summer. Unfortunately, when a yard isn't maintained, it can get out of hand pretty quickly and become a code violation. Besides being an eyesore to neighbors, it can also block driver visibility at intersections and even harvest unwanted insects/critters.

If grass/weeds exceed twelve inches in height, the property owner will be notified via certified mail

and/or a notification posted on the property. After which the owner will have ten business days to remedy the violation. If this is not accomplished within that timeframe, the owner will then be cited to court and the judge would make a ruling. Our staff welcomes citizens

to notify us if there is an overgrown or dirty lot that needs attention. This can be done via telephone call to the Planning and Codes office (615-616-1020). You can also send a notification through the city website (www.whitehousetn.gov) to Report an Issue. This is an excellent tool for citizens, as it allows us to communicate and respond when an issue has been addressed along with details involving the issue.

Another duty of the Code Enforcement staff is to administer the city's sign ordinance. Residential and commercial property owners/tenants can apply for temporary and staff approved permanent sign permits for their property. Our staff will review the application and issue the permit, as long as it fits within the guidelines of the zoning ordi-

nance in section 4.070. This can be found on the city's website (<https://www.whitehousetn.gov/government/zoning-ordinance>). Some of the criteria reviewed for the signs include location and size.

The city also offers Temporary Sign Permits:

White House Zoning Ordinance, Section 4.070 Standards for Signs, Item I:

Temporary Site Signs- Any business, individual, or organization may display one (1) banner sign per lot. In the case of multiple tenants per lot than no more than two (2) signs will be permitted at any one time. The signs must be separated by at least twenty-five (25) feet. The sign or signs can be placed a maximum of four (4) times a year not exceeding twenty-eight (28) days in any calendar year, with twenty-one (21) days between permits. A sign permit shall be obtained each time a banner is placed on site. A temporary banner sign shall not exceed twenty (20) square feet in area. The location and height of banner signs shall be in accordance with the White House Zoning Ordinance. Temporary Event and

Advertising Signs pursuant to this section shall be required to have a permit issued without fee from the Planning and Codes Department.

Any illegal signage that is placed around the city without a sign permit, such as off-premise advertisements, will be removed by Code Enforcement staff. This is done in an effort to keep White House beautiful. Old yard sale signs left out days after the sale, become litter. We ask that those advertising their yard sale be respectful of our city ordinances. We ask that you remove signage after the event. Other illegal signage to be aware of, include pennant banners, inflatable "air dancers," and flag signs (without the proper permit).

Let's work together to keep White House beautiful!

CITY OF WHITE HOUSE FIRE DEPARTMENT

Protecting the Protectors

The core mission of the White House Fire Department, or any fire department for that matter, is to Save Lives and Protect Property. Here at WHFD, we strive to provide our city with the best service possible! We're fortunate to have some of the most state-of-the-art equipment at our disposal, and rigorous training standards go along with that equipment. We're passionate about the job, and we're committed to excellence.

But who protects the protectors? Firefighting is an inherently dangerous profession, but of course we knew that when we signed up. It may surprise you to know that very few firefighter fatalities actually happen on the fire-ground, relatively speaking. The majority of firefighter deaths result from either motor vehicle accidents, or cardiac events resulting from stress and overexertion.... at least that used to be the case.

The dreadful C-word – CANCER. According to the CDC, cancer is now the leading cause of death among firefighters. Firefighters carry nearly double the risk of certain cancers than the general population. This is due in part to many of the synthetic materials found in home furnishings, and even building materials. Modern vehicles are probably the worst offenders, with nearly every interior and trim part on the vehicle made from synthetic plastics.

Luckily, at least on the fire-ground, we've learned how to mitigate this risk. We adhere to strict

protocols about wearing respiratory protection during overhaul, as well as gross decontamination on scene until our gear can be properly cleaned and decontaminated.

While most of these risks seem fairly obvious, a big risk factor that maybe most wouldn't think about, and is seemingly benign: diesel exhaust. While exposure to any vehicle exhaust has the potential for adverse health effects, diesel exhaust contains higher amounts of toxic gases and particulates. Unburned hydrocarbons, carbon monoxide (CO), and diesel particulates can pose serious health risks in the long term. Add to that the operation of our gas-powered tools, and air quality in the fire station can become a huge concern.

While our stations are equipped with air monitoring and ventilation devices, those devices only activate when the level of gases reaches a certain threshold. Opening the bay doors will also provide sufficient ventilation in the apparatus bays, but the major concern is exhaust gases getting into our living quarters. Linger exhaust from morning truck checks or returning from a call can enter our living spaces as soon as we open the door. We try to be as vigilant as possible to allow proper ventilation, but this cannot be accomplished 100% of the time.

So, what else can we do to protect ourselves?

Well, enter the MagneGrip® Exhaust Removal System. These systems were recently installed at

both fire stations and are now in use. The system captures the exhaust from the apparatus and removes it from the structure. The company actually guarantees 100% capture when the system is used properly.

The MagneGrip® system utilizes flexible ductwork that attaches directly to the vehicle's tailpipe using a sealed, magnetic locking mechanism, and pressure sensors automatically activate the exhaust fan(s) when the vehicle is running. Additionally, the ductwork is mounted to a rail system, so it follows the apparatus all the way out of the bay and detaches once the vehicle has cleared the door. Once the apparatus returns from a call, we simply reattach it just outside of the bay, and back the apparatus in.

The system also features a manual mode, so if we need to perform daily truck checks inside the bay, such as during inclement weather, we're able to remove the exhaust during the start-up portion of the check off. In conjunction with our current air monitoring/re-

moval system, we're able to keep nearly all toxic gases out of the bay and out of our living quarters.

Not only are we able to keep toxins out of our living quarters, we've now vastly improved

our air quality, in the bays especially. So now we're not breathing in all this nasty stuff, particulates are no longer clinging to us or our bunker gear, and we've greatly reduced our exposure.

Again, we can never hope to make our profession 100% safe, it's just not the nature of our business, and some things are simply beyond our control. However, we're becoming proactive in mitigating the things we CAN control. Aggressive training about hazard recognition, better protocols for PPE and respiratory protection, and equipment like the MagneGrip®, will allow us to work healthier, and perform at a higher level to serve our citizens. We are VERY fortunate to now utilize this very important piece of equipment and the important benefits it provides!

PUBLIC SERVICES

Trash and Recycle

On April 1st of 2024, The Public Services Department and Waste Management made the decision to make much needed adjustments to our trash and recycling collection routes throughout the City of White House. These changes allowed the Public Services Department and Waste Management to more effectively dispose of trash and recycling, additionally this change was a big step in the right direction to accommodate the growth our city is experiencing by allowing new residents to be added to the trash and recycle schedule. Due to this change, trash and recycle carts are placed at the curbside together twice per month at each residence depending on their scheduled collection day. Because both carts are at the curbside at the same time you will notice two

separate but very similar looking Waste Management Collection Truck picking up the trash and recycling at your residence.

As mentioned before these trucks will carry out their collection operations in a concurrent fashion in the same area of the City of White House. Be-

cause these trucks look so similar it may be hard to differentiate between which truck is disposing of trash and which is disposing of recycling. Together, the Public Services Department and Waste Management want to assure all residents that trash will be placed in a Waste Management Trash Collection Truck and recyclables

will be placed in a Waste Management Recycling Collection Truck.

We are even able to ask for the tracking information on the vehicles that have conducted their route in a specific area. Attached below is a map from Waste Management showing the different routes of different trucks in the same area. This is yet another way Waste Management and the Public Services Department are improving efficiency and effectiveness.

In the attached picture you will notice there are two separate colors denoting the difference between the trash collection vehicle and the recycling collection vehicle.

CLICK IT OR TICKET

POLICE DEPARTMENT

Practice Basic Summer Pet Safety

Never leave your pets in a parked car!

Not even for a minute! Not even with the car running and air conditioner on. On a warm day, temperatures inside a vehicle can rise rapidly to dangerous levels. On an 85-degree day, for example, the temperature inside a car with the windows opened slightly can reach 102 degrees within 10 minutes. After 30 minutes, the temperature will reach 120 degrees.

Watch the humidity

“High humidity amplifies the negative impact of high temperature on your pet—and in combination, these factors magnify the danger zone,” says Dr. Barbara Hodges, DVM, MBA, of the Humane Society Veterinary Medical Association. “When animals pant, moisture from their lungs evaporates and helps reduce their body heat. But high humidity conditions hamper that process and their ability to cool themselves, and

their body temperature can skyrocket—rapidly—to dangerous, or even lethal, levels.”

Limit exercise on hot days

Take care when exercising your pet. Adjust intensity and duration of exercise in accordance with the temperature. On very hot days, limit exercise to early morning or evening hours, and be especially careful with pets with white-colored ears, who are more susceptible to skin cancer, and short-nosed pets, who typically have difficulty breathing. Asphalt gets very hot and can burn your pet’s paws, so walk your dog on the grass if possible. Always carry water with you to keep your dog from dehydrating.

Don’t rely on a fan

Pets respond differently to heat than humans do. (Dogs, for instance, sweat primarily through their feet.) And fans don’t cool off pets as effectively as they do people.

Provide ample shade and water

Any time your pet is outside, make sure they have protection from heat and sun and plenty of fresh, cold water. In heat waves, add ice

to water when possible. Tree shade and tarps are ideal because they don’t obstruct air flow. A doghouse does not provide relief from heat—in fact, it makes it worse.

Cool your pet inside and out

Whip up a batch of quick and easy DIY pupsicles for dogs. And always provide water, whether your pets are inside or out with you. Keep your pet from overheating indoors or out with a cooling body wrap, vest or mat. Soak these products in cool water, and they’ll stay cool (but usually dry) for up to three days. If your dog doesn’t find baths stressful, see if they enjoy a cooling soak.

Watch for signs of heatstroke

Extreme temperatures can cause heatstroke. Some signs of heatstroke are heavy panting, glazed eyes, a rapid heartbeat, difficulty breathing, excessive thirst, lethargy, fever, dizziness, lack of coordination, profuse salivation, vomiting, a deep red or purple tongue, seizure and unconsciousness.

How to treat a pet suffering from heatstroke

Move your pet into the shade or an air-conditioned area. Apply ice packs or cold towels to their head, neck and chest or run cool (not cold) water over them. Let them drink small amounts of cool water or lick ice cubes. Take them directly to a veterinarian.

Prepare for power outages

Before a summer storm takes out the power in your home, create a disaster plan to keep your pets safe from heat stroke and other temperature-related trouble.

Greenway Safety Tips

Trail Safety Tips

- Carry a cell phone in case of emergency. Program the White House Police Department’s number into your cell phone before you leave.
- There is safety in numbers. Use the buddy-system and enjoy the trail with a companion.
- Park in a well-lit, heavily-trafficked area. Lock your vehicle and do not leave valuables such as purses, wallets, jewelry, or cell phones inside.

- Carry identification including your name, phone number, critical medical information, and a contact name/number in case of an emergency.
- Wear comfortable sport shoes, loose-fitting clothing appropriate for the weather, and use proper safety equipment.
- Wear bright and/or reflective fabrics and carry a whistle or noisemaker.
- Tell friends or family the route you will be taking and when you expect to return. If you are going to be late, give them a call.
- Stay on the designated trail and avoid short-cutting or crossing open country.
- Be alert and aware of your surroundings. Avoid areas where visibility is poor, and be aware of sounds in your environment.
- Be confident. Look people in the eye and let others know you are aware of their presence with a polite “Hello!”
- When you approach your car, have your key ready. Check the floor and back seats before you get in.

Trail Rules

- The trail is open from sunrise to sunset daily. The trail closes at dark.
- Children must be supervised by an adult.
- With the exception of motorized wheelchairs, only non-motorized vehicles are permitted.
- Pets must be kept on a leash, and people must clean up after their pets.
- This trail is not intended for equestrian use; no horses, ponies, or other equines allowed.
- No smoking, littering, or alcoholic beverages.
- No fires, pyrotechnics, launching of hobby-rockets or balloons.
- No annoying, offensive, or profane languages or gestures.
- No skateboards allowed.
- Keep right, except to pass.
- No destruction/removal of plants, animals, or defacing of trees, fencing, or property.

WHPD Summer Crime Prevention Tips

Summer time crime can increase and the opportunities for criminal activity. The White House Police Department suggests these simple tips to assist you in having a safe Summer season.

Be ALERT and AWARE of your surroundings.
Pay attention to who is around you and what activities are happening. Don’t leave the safety of a building or your vehicle until you have ensured all is secure and safe. Trust your instincts; if you feel uncomfortable with a place or person(s), get away.

Park in well-lit areas.

Remember to lock your vehicle at home and away!!
Keep vehicle doors and windows locked while you are in it and especially when you are not! Use anti-theft steering wheel clubs or locks as well. A thief is looking for easy targets & anything you can do to deter them from choosing your car, the better.

Minimize the number of valuables left in your vehicle
Keep valuables, electronics (including cell phones and DVDs), guns and other “theft attractors” out of sight.

Protect your purse or wallet
Clean out any unnecessary items before leaving home. Don’t carry large amounts of cash or extra credit cards. Carry only those cards that you will need to use that day. Keep a master list of all cards so if your wallet is stolen, they can be reported promptly to the appropriate banking facility.

Never leave your purse, wallet or cell phone unattended in a public place.

Role-play with children
about what should happen in the event you are separated.

Have your keys out and ready when you return to your vehicle.

Do not leave your car unattended
with the motor running or with the keys in the ignition – even for the very short time needed to do a quick errand or pay for fuel.

Contact the White House Police Department to report all criminal activity:

THE LIBRARY IS GOING FINE FREE!

What does this mean for our patrons?

- No overdue fines on books, movies, and more.
- ONLY tech devices will accrue late fees.
- E-materials, like e-books, e-audio, and digital magazines will continue to be free of charge.
- When lost materials are returned, fines will be waived.
- Past overdue fines will be waived on all current accounts on March 18th, 2024.
- We will continue to bill and collect for lost items and block patron card access if items are not returned or paid for in a reasonable amount of time.

FOLLOW US ON SOCIAL MEDIA!

Scan the QR code to go directly to the Library Facebook page!

The White House Library Board will meet on July 11, 2024 at 7:00pm at the Billy S. Hobbs Community Center located at 105D College St. White House, TN 37188. Per the TCA Title 8, Chapter 44 regarding public meetings, a Public Comment section is on the meeting's agenda. To speak during the Public Comment period, a sign-up sheet will be placed in the meeting location near the printed agendas and will be taken up just before the start of the meeting.

Children Programs (ages 9 and under)

- Mondays: Crafternoon at 4PM for ages 6 to 10
- 1st Monday of the Month: Reading Dog at 4pm for ages 5-9
- Tuesday: Storytime at 10:30 for ages 0-5

MEET OUR STAFF MEMBER OF JUNE!

Hello! My name is Ms. Courtenay. I am the children's librarian at the library. I have been with the library for 10 years. I am in charge of Tots Story Time, Big Kids Club, Monday Crafternoons, and the PreK-2 Homeschool Group. I also plan and implement the summer and winter reading programs with help from Ms. Audrey, our teen librarian, and Tammy, our adult services librarian. One fun part of my job is getting to purchase books for kids in the easy and juvenile sections. Some of my favorite children's book characters include Elephant and Piggie, Splat the Cat, and Ryan Higgins' Mother Bruce. When not working, I am usually hanging out with my best friend, helping her with her small business or relaxing at home with my pets.
